

“The Coady program will improve my knowledge, attitude and skills on more practical and appropriate ways of engaging with communities for maximum gain.”

Hellen Ofwono Ochieng

Area Programmes Manager

Uganda Orphans Rural Development Programme (UORDP)

My responsibility at UORDP is to coordinate efforts in planning, implementation and supportive monitoring of project interventions (early childhood development, food security and nutrition, sustainable environmental management, income generating projects, preventive health). Through engaging with community based organization (CBO's), planning sessions regarding projects are held with members of the community management committee (CMC) and project managers prior to implementation.

UORDP's overall goal is to harness and consolidate self-driven community initiatives for vulnerable children, their families and communities.
