

“As leaders in our world community we have a responsibility to face our fears so we can learn and grow from within. It is this inward growth that will have the greatest impact on our work outwardly.”

Mary Anne Tidlund

President/Founder

Mary A. Tidlund Charitable Foundation, Canada

As President of the foundation, I, along with my directors, staff and volunteers, work in 20 countries including Canada to affect change for over one million people through more than 60 different programs. My time is spent raising funds, reviewing and operating programs, managing staff and volunteers, and speaking publicly across North America.

The Foundation focuses on women and children in areas of health and wellness, education, medical clinics, educational sponsorship, school construction, water, and micro credit initiatives.

We work to fund and support people and organizations in need in Canada and internationally. We deliver effective and sustainable health and education programs, educate and support individuals and organizations in setting up grass roots development programs, and build healthy relationships with the partners we work with. It is our goal to be able to fund and deliver programs that empower people.
