

“I came to Coady Institute to improve and develop my leadership skills, and learn more about advocacy.”

Mycel Acquaaah-Mensah

Executive Director

Fracel Helping Hand Foundation (FHMF), Ghana

My work in the organization is:

- the general well-being of the organization
- see to the effective and efficient implementation of projects
- coordinate the planning and implementation of projects

Our doors are open to the community members to come in at any time with their problems. Now, the women know how to plan their lives by the use of contraceptives.

The main goal of FHMF is to carry out advocacy programs, public education training and service delivery in maternal and child health. FHMF also seeks to bring about the dismantling of systems, practices and attitudes that dehumanize women and children, through active engagement with individuals, civil society and state institutions.
