

“At Coady, I want to challenge myself. I will learn through my own experience and that of others. I will also unlearn the things I do that make me less effective as a leader.”

Isaac Akuoko Boateng

Technical Associate

ACDI/VOCA - Ghana

My work as a technical associate involves building the capacity of our field staff in value chains and supporting them with innovative ideas to solve problems they encounter in the field. In the various communities that we work in, we have facilitated farmers' access to markets for their produce, linked them to agro input dealers, mechanization service providers, financial services and extension services. We have seen farmers change their attitudes towards agriculture and make more money for their pockets.

At ACIDI/VOCA, our primary focus is to empower people to succeed in the global economy and we do this by promoting economic opportunities for cooperatives, enterprises and communities. Our facilitation approach to sustainable development enables farmers and agribusinesses to take charge and own their development process. Our impact: beneficiary-driven solutions that foster self sufficiency, build skills and capacity and increase household income and food security.
