

I came here to sharpen my knowledge and skills and enhance my capacity to lead my organization and the community. I want to be able to understand development paradigms at different levels to help me face professional challenges.

Ammar Air

Programme Development and Monitoring Coordinator

Sahakarmi Samaj, Nepal

My role in the organization is to build the capacity of community-based organizations and local government agencies in the field of process-led development approaches. I design and facilitate training and learning courses for communities and organizations. My responsibilities also include program development, planning, monitoring/evaluation and report preparation.

Sahakarmi Samaj is a non-governmental organization committed to process-led development approaches and has been working 18 years in the mid and far-western development region of Nepal. SS works with marginalized communities and community network organizations to enhance their capacity and strengthen community governance.

Its mission is to ensure that there is sufficient capacity amongst disadvantaged and marginalized people, as well as amongst the organizations and institutions whose purpose is to serve them. We believe in the just distribution of rights, opportunities and resources and an optimal quality of life for all.
