

I came to Coady to gain a global understanding of development and identify what I can take home to better my work and bring our organization to another level.

Moses Aisia

Founder and Executive Director

Apoolo Na Angor - ANA (Development of Women), Uganda

My role is to facilitate the participatory planning and resource mobilization required to help us reach our goals. We work with cooperatives and other organizations to bring in skills and resources to fulfill our mission. I am always on the run, attending to meetings and speaking out about the need for global solidarity for us all.

Our mission is to transform Eastern Uganda by empowering community groups through health, agriculture and educational programs. As a grassroots organization, ANA aims to promote attitudes of dignity and harmony while engaging communities in holistic development. Apoolo Na Angor seeks to provide household agricultural support, community-based healthcare, and continuing education to vulnerable people. We work through and with village groups in order to facilitate their roles as change agents and leaders of the Teso region.
