

*I come to Coady to learn more about development methods and approaches and to learn about regional and international best practices. I also want to take higher education or advance training on development courses as well.*

# Palash Kumar Kundu

*Coordinator, Program Development and Resource Mobilization*

*SKS Foundation, Gaibandha, Bangladesh*

My main focus as coordinator is to develop programs for resource mobilization to address social, environmental and economic challenges facing communities in our working areas. I am serving as a program team member in mobilizing resources for organizational sustainability and gradual development. I also submit calls for proposals by donors, individuals or funding institutes of governments.

SKS Foundation is a non-government development organization, established in 1987. It has been implementing development interventions in the impoverished northern part of Bangladesh. Our vision is a poverty-free society where human rights and social justice are promoted. We promote local capacity, the elimination of gender discrimination and address vulnerability to climate-change.
