

Learning and sharing with people from different cultural backgrounds is a wonderful experience that I have often dreamt of. At Coady, 'leaders are made, not born'.

Michel Sungnin Gwanbobmuga

Coordinator for youth and development program

Helpa Development Community Cooperation, Cameroon

My activities include: sensitizing villages on conflict issues, educating communities on child trafficking, sensitizing the underprivileged on premarital sex, early marriage and the importance of educating girls; community development activities/educating youths on reproductive health care. I have also been involved in building leadership and capacity of rural/urban groups, organizations, activists and other actors in the field of development, human rights and economic justice.

Our organization serves disadvantaged and underprivileged communities. It has focused on promoting the following three key areas for children, youth and women's health; education and awareness; and sustainable livelihoods and food security. The organization provides much-needed services regarding HIV/AIDS and life skills. We also provide opportunities for girls to get an education by providing school needs.
