

I am at Coady to elevate my leadership skills, and to learn how to influence others in my sector to consider gender as equally important as technology made by engineers. I seek to especially bring forward women's voices, their needs and rights for reliable energy access.

Sandra Winarsa

Project Manager Green Energy

Hivos Southeast Asia, Indonesia

I am fascinated and connected to how energy can transform people's lives, especially women in rural communities. I am responsible for managing the Sumba Iconic Island initiative; a programme to support Sumba Island located in the eastern part of Indonesia and to give its 650,000 people a wider access to renewable energy forms. Additionally, we work to promote an inclusive gender-balanced local economy through the use of energy for sustainability.

Hivos is an international development organization that seeks new solutions to ongoing global issues with a focus on achieving structural change. Using small projects in the right places, Hivos opposes discrimination, inequality, abuse of power and unsustainable usage of natural resources.
